TECHNICAL EVALUATION

REF. FRONTEND VUEJS JAVASCRIPT DEVELOPER

Instructions

- Create a web application (SPA) using Vue.js, Quasar Framework, Vuex, Axios and Sass.
- Upload to a public Github repository and send the link to jobs@ncodingbol.com with subject "Evaluation - Frontend Developer"
- Duration: You should submit your repository within 42 hours once you receive the evaluation

Application Specifications

The web application (SPA) you are going to create should allow students (Users) to perform the following actions:

- Register (Create User)
- Complete his/her user profile
- Enroll to multiple courses of multiple categories like UX/UI, Programming, DevOps, etc.
- List all enrolled courses
- Unsubscribe from one or multiple courses

Note: Please use Vuex (in local storage) or any other browser tool to save/retrieve data.
(If you are applying for a full-stack position please use the REST API of backend evaluation)

Recommendations

- Write code in English
- Use best-practices
- Create clean code
- Create a good look and feel UI
